

Do you need a vaccine for travel?

Vaccines needed for travel to specific countries are now provided by certain community pharmacies.

These vaccines are:

- Hepatitis A
- Typhoid
- Hepatitis A and typhoid combined
- Cholera
- Revaxis (polio / diphtheria / tetanus)

These vaccines are free of charge for people who live in Lanarkshire or who are registered with a Lanarkshire GP practice.

If you need other vaccines or anti-malarials not included in this service, pharmacies may offer these at a cost.
